

Hg80® Hinged Knee Brace

MUELLER-exclusive HYDRACINN™ fabric is the moisture-wicking catalyst for maintaining superior support with heat management. Base sleeve is made of antimicrobial fabric that is uniquely breathable, extremely soft to the touch with flatlock seams, and features a conforming hourglass design. Inner grip strips complete the anti-sweat/non-slip design to help prevent brace migration and preserve high-performance support. This ultimate brace provides maximum support for weak or unstable knees, as well as protection after injury.

- Upper strapping system locks brace in position. Outer mesh shell with bidirectional stretch fabric fastens on the sides then comfortably locks across the quadriceps.
- Patented Triaxial Hinges provide maximum protection with near-normal knee motion.
- Tibial Containment System features a custom secondary shell with stabilizing patella buttress and rear support strap.

Anti-slip INNER GRIP STRIPS help prevent brace migration.

Formfitting HOURGLASS DESIGN with superior support for each Hg80 Knee Brace.

Mueller-exclusive HYDRACINN™ fabric is a revolutionary moisture-wicking and neoprene-free material.

Protective Nylon MESH LAUNDRY BAG comes custom-sized for every Hg80 brace to shield your clothing and other equipment in your gym bag or washing machine from hook & loop straps. The open weave design with locking cinch string allows for a thorough yet gentle cleaning.

Measure around center of knee

54011	Small	12-14"	30-35 cm
54012	Medium	14-16"	35-40 cm
54013	Large	16-18"	40-45 cm
54014	X-Large	18-20"	45-50 cm
